

We post Tiktok videos at scale (up to thousands per day)

Our tool allows to track video performance based on any desired variable - whether that's a type of hook, text font, marketing angle, hook length, video length, scene parameters like lighting or colors, and even combinations of multiple parameters - it can be as concise or as detailed as you want.

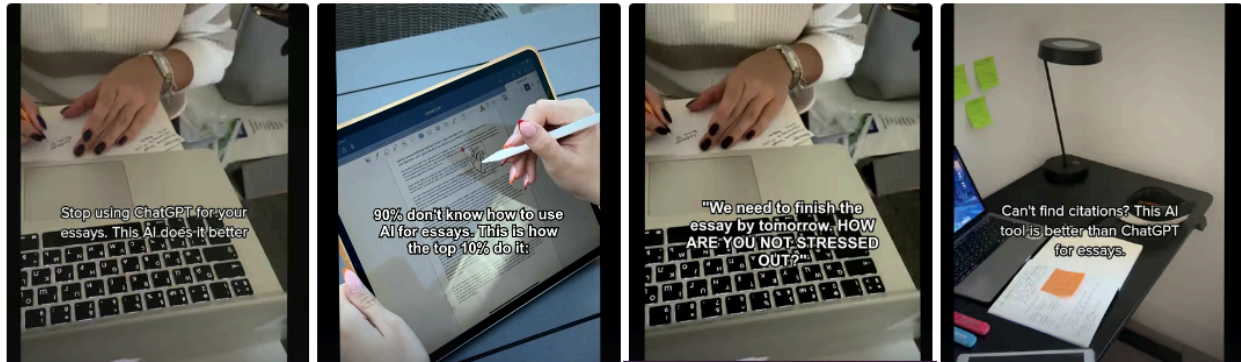

Each video can have an unlimited amount of tags for each parameter variation - this way we can find winning hooks and elements that you need.

We can track views and engagement - saves, shares and comments.

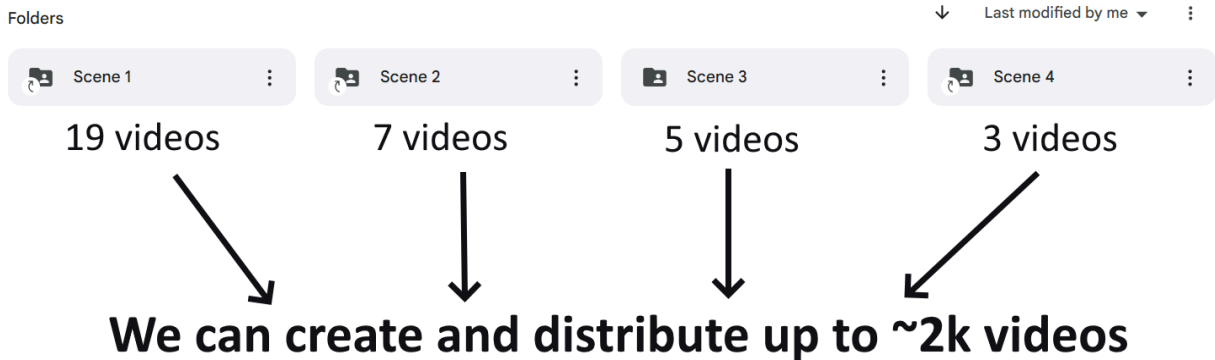

We can integrate the tool to track performance on your existing accounts, OR we can run **A/B tests on a large scale**, using our own accounts.

Example:

Each video consists of parts in different combinations (background footage, overlaying text, etc). Variations are especially important in the hook - first part of the video.

We can automatically produce and publish all possible combinations with your initial footage. And track all the metrics.

After enough videos have been posted - we can analyze the results to find the best performing elements.

hook	second	third	end	Text 1	Text 2	Text 3	views	
12	1	1	1	1	14	1	3	944
15	6	6	6	2	27	4	3	50
3	1	3	2	2	27	4	3	71
1	5	2	6	6	26	4	3	22
1	2	6	5	5	26	4	3	88
12	5	1	5	5	24	2	1	356
12	6	4	6	6	24	4	3	72
15	5	1	5	5	18	4	3	101
1	6	6	1	1	18	4	3	45
16	4	1	1	1	17	4	3	0
